AB The invention relates to a feline interleukin-12 (IL-12) as an adjuvant or immune stimulant, both in the vaccination against and therapy of infectious diseases in cats. The invention also relates to methods allowing both subunits of IL-12 to be expressed in the required quantity ratios. Thus, plasmids encoding \*\*\*feline\*\*\* IL-12 \*\*\*p35\*\*\* and \*\*\*p40\*\*\* subunits, as well as a plasmid encoding both p35 and p40 subunits, were prep'd. The complete IL-12 was produced in an in vitro transcription/translation system. Cats immunized with FIV gp140 DNA and IL-12 DNA were protected from challenge with FIV.

AB A full length cDNA of \*\*\*feline\*\*\* interleukin(IL)-12 \*\*\*p35\*\*\* and \*\*\*p40\*\*\* subunits was cloned. By transferring the plasmids contg. both the subunit genes to mammalian cells, we expressed biol. active feline IL-12. The expressed feline IL-12 has interferon-gamma-inducing activity against both human and feline peripheral blood mononuclear cells (PBMC) and stimulates cytotoxic T lymphocyte activity against herpes simplex virus-infected human PBMCs. There were two kinds of mols. (p75, p80) in the purified recombinant feline IL-12, and both mols. exhibited biol. activity. The difference between p75 and p80 was the degree of the glycosylation of the p35 chain. Moreover, when we modified the cDNA of p35 by changing some codons and deleted the 5' and 3' non-coding regions, the expression level of IL-12 increased about 100-fold.

AB Feline Interleukin-12 (IL-12) is a heterodimeric glycoprotein consisting of two disulfide linked subunits of about 40kD (p40)

and 35kD (p35). It is a pleiotropic cytokine mediating biol. activities on T- and NK-cells. One important function is the induction of a Th1 immune response. Here we report the cloning and sequencing of feline IL-12, the expression of the p40-protein in E. coli and prodn. of monoclonal antibodies. At the nucleotide level, feline IL-12 shows between 87-90%, on the amino acid level between 82-87% identity to the bovine and human IL-12, resp.
